Beijing, November 15, 2012—21Vianet Group, Inc. (NASDAQ: VNET) (“21Vianet” or the “Company”), the largest carrier-neutral Internet data center services provider in China, today announced its unaudited financial results for the third quarter of 2012. The Company will hold a conference call at 8:00 a.m. Eastern Time on November 16, 2012. Dial-in details are provided at the end of the release.

Third Quarter 2012 Financial Highlights

- **Net revenues** increased by 51.4% to RMB396.1 million (US\$63.0 million) from RMB261.6 million in the comparative period in 2011.
- **Adjusted EBITDA¹** increased by 41.4% to RMB76.0 million (US\$12.1 million) from RMB53.7 million in the comparative period in 2011.
- **Adjusted EBITDA margin²** was 19.2%, compared with 19.3% in the previous quarter and 20.5% in the comparative period in 2011.

Mr. Josh Chen, Founder, Chairman and Chief Executive Officer of the Company, stated, “We continued to deliver solid results in the third quarter by further expansion and diversification of our Internet and cloud infrastructure capabilities. As we remain focused on expanding our data center footprint, we also believe that we are well positioned to capitalize on new emerging opportunities in China. As an example, our recent acquisition of Fastweb International Holdings (“Fastweb”), as well as our recent partnership with Microsoft to offer cloud services in China, together, offer us promising new revenue streams. We believe that these initiatives, combined with the increasing Internet data usage in China, will significantly strengthen 21Vianet’s future growth potential over the coming years.”

Mr. Shang-Wen Hsiao, President and Chief Financial Officer of the Company, commented, “We are pleased with the steady expansion of our self-built data centers and our partnership with Microsoft, which will not only help us meet the growing customer demands for our services, but will also improve our ability to drive meaningful margin improvement. As we continue to leverage our core data center business by integrating Fastweb and building-up our cloud platform, we believe these new initiatives will further solidify our foundation and growth potential going forward.”

Third Quarter 2012 Financial Results

REVENUES: Net revenues for the third quarter of 2012 increased by 51.4% to RMB396.1 million (US\$63.0 million) from RMB261.6 million in the comparative period in 2011.

Net revenues from hosting and related services increased by 32.8% to RMB218.9 million (US\$34.8 million) in the third quarter of 2012 from RMB164.8 million in the comparative period in 2011, primarily due to an increase in the total number of cabinets under management in both the Company’s self-built and partnered data centers, which was attributable to growing customer demand. Net revenues from managed network services increased by 83.0% to RMB177.2 million (US\$28.2 million) in the third quarter of 2012 from RMB96.8 million in the comparative period in 2011, primarily driven by an increase in network capacity demand for data transmission services.

¹ Adjusted EBITDA is a non-GAAP financial measure, which is defined as EBITDA excluding share-based compensation expenses and changes in the fair value of contingent purchase consideration payable.

² Adjusted EBITDA margin is a non-GAAP financial measure, which is defined as adjusted EBITDA as a percentage of total net revenues.

GROSS PROFIT: For the third quarter of 2012, gross profit increased by 54.2% to RMB110.4 million (US\$17.6 million) from RMB71.6 million in the comparative period in 2011. Gross margin for the third quarter of 2012 increased to 27.9% from 27.4% in the comparative period in 2011.

Adjusted gross profit, which excludes share-based compensation expenses and amortization of intangible assets derived from acquisitions, increased by 50.9% to RMB118.7 million (US\$18.9 million) from RMB78.7 million in the comparative period in 2011. Adjusted gross margin remained stable at 30.0%, compared with 30.1% in the comparative period in 2011.

OPERATING EXPENSES: Total operating expenses were RMB102.3 million (US\$16.3 million), compared to RMB38,000 in the comparative period in 2011. The increase in operating expenses primarily reflected a RMB12.0 million (US\$1.9 million) non-cash expense in the change in the fair value of contingent purchase consideration payable recorded this quarter, as compared with a RMB54.9 million gain in the third quarter of 2011.

Sales and marketing expenses increased to RMB28.9 million (US\$4.6 million) from RMB20.9 million in the comparative period in 2011, primarily due to the expansion of the Company's sales and service support team.

General and administrative expenses increased to RMB42.6 million (US\$6.8 million) from RMB24.6 million in the comparative period in 2011, primarily due to an increase in headcount, office rentals and other expansion related expenses.

Research and development expenses increased to RMB18.8 million (US\$3.0 million) from RMB 9.4 million in the comparative period in 2011, which reflected the Company's efforts to further strengthen its research and development capabilities and expand its cloud computing service offerings.

Change in the fair value of contingent purchase consideration payable was RMB12.0 million (US\$1.9 million) during the third quarter of 2012, compared with a gain in the change in fair value of contingent purchase consideration payable of RMB54.9 million in the prior year period. This non-cash expense was primarily due to an increase in the market value of the Company's shares, which resulted in an increase in the fair value of share-based contingent purchase considerations payable as of September 30, 2012 associated with the Company's acquisitions of the Managed Network Entities, Gehua and Fastweb.

Adjusted operating expenses, which exclude share-based compensation expenses and the changes in the fair value of contingent purchase consideration payable, increased to RMB68.8 million (US\$10.9 million) from RMB41.4 million in the comparative period in 2011. As a percentage of net revenue, adjusted operating expenses were 17.4%, compared to 15.8% in the comparative period in 2011.

ADJUSTED EBITDA: Adjusted EBITDA for the third quarter of 2012 increased by 41.4% to RMB76.0 million (US\$12.1 million) from RMB53.7 million in the comparative period in 2011. Adjusted EBITDA margin for the quarter was 19.2%, compared with 19.3% in the previous quarter and 20.5% in the comparative period in 2011. Adjusted EBITDA in the third quarter of 2012 excludes share-based compensation expenses of RMB23.0 million (US\$3.7 million) and changes in the fair value of contingent purchase consideration payable of RMB12.0 million (US\$1.9 million).

NET PROFIT/LOSS: Net profit for the third quarter of 2012 was RMB12.2 million (US\$1.9 million), compared to RMB87.7 million in the comparative period in 2011. The decrease in net profit was due to the aforementioned change in the fair value of contingent purchase consideration payable that the Company recorded during the quarter and an RMB1.2 million (US\$193,000) foreign exchange loss in this quarter, compared with a RMB\$24.2 million gain in the comparative period in 2011.

Adjusted net profit for the third quarter of 2012 was RMB52.2 million (US\$8.3 million), compared with RMB61.6 million in the comparative period in 2011. Adjusted net profit in the third quarter of 2012 excludes share-based compensation expenses of RMB23.0 million (US\$3.7 million), amortization of intangible assets derived from acquisitions of RMB6.8 million (US\$1.1 million), and changes in the fair value of contingent purchase consideration payable and related deferred tax impact of RMB10.2 million (US\$1.6 million) in the aggregate. Adjusted net margin was 13.2%, compared to 23.6% in the comparative period in 2011.

EARNING/LOSS PER SHARE: Diluted earnings per ordinary share for the third quarter of 2012 was RMB0.03, which represents the equivalent of RMB0.18 (US\$0.03) per American Depository Share (“ADS”). Each ADS represents six ordinary shares. Adjusted diluted earnings per share for the third quarter of 2012 was RMB0.15, which represents the equivalent of RMB0.90 (US\$0.14) per ADS. Adjusted earnings per share is calculated using adjusted net profit as discussed above to divide the weighted average shares number.

As of September 30, 2012, the Company had a total of 346.4 million ordinary shares outstanding, or the equivalents of 57.7 million ADSs outstanding.

BALANCE SHEET: As of September 30, 2012, the Company’s cash and cash equivalents and short-term investment were RMB0.7 billion (US\$113.6 million), compared to RMB1.3 billion as of December 31, 2011.

Prior to Fastweb, Mr. Liu was the director of business development at Akamai Technologies, Inc. (“Akamai”), one of the world’s leading CDN service providers.
